

# MINERAL SEARCH

**Mark each crystal as you uncover the answers! Some answers are tucked away in the pull-out drawers, so make sure to look inside.**

-  Find a mineral for every color of the rainbow. Cross off each one as you find it. **RED ORANGE YELLOW GREEN BLUE PURPLE**
-  Look for a mineral that was found in Nebraska.
-  Geodes form when a hollow cavity in a rock is filled with minerals, leading to the slow growth of crystals over time. Can you find one on display?
-  Minerals make up everything around you. Find a mineral that is in an object you might find at home.
-  Look for a mineral with a Mohs Hardness of 2 or less. These minerals could be scratched with your fingernail!
-  Did you know some minerals are toxic? They can be harmful to humans if mishandled. We have one on display. Can you find it?
-  Different countries have different minerals depending on what elements are found there. Find a mineral that came from another country.
